# Glass Racks

# Glass Racks

## Features

Needs no second wash, efficiently saving time and cost.  
Make the glassware cleaner.

### Open Profile

Allows top-to-bottom and side-to-side washing, making the glassware cleaner. Allows more air to circulate through the racks and makes faster drying and safer storing.

### Stackability

Snap-fit construction shortens assembly time, and stacks all racks tightly.

### Tight Connection

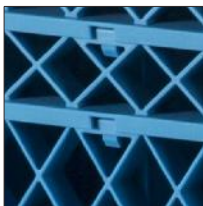

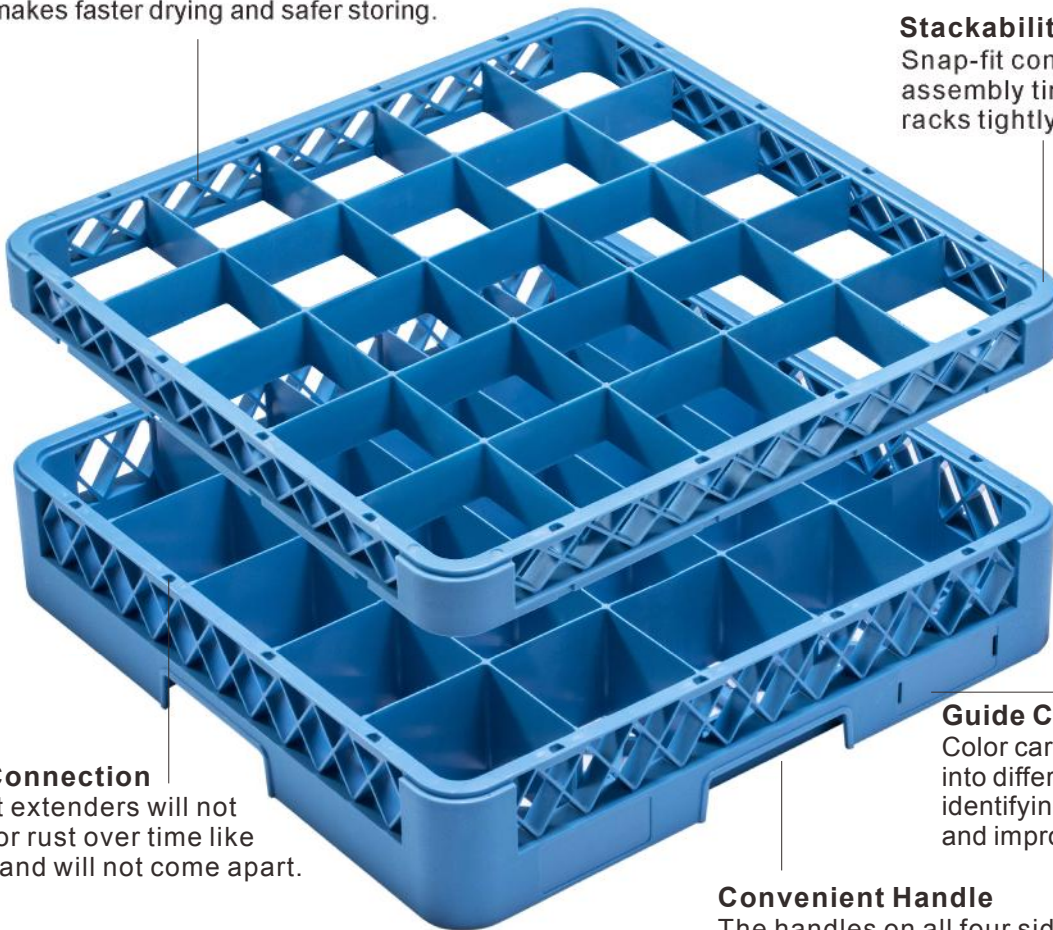

Snap-fit extenders will not loosen or rust over time like screws and will not come apart.

### Guide Cards Groove

Color cards can be inserted into different colors to facilitate identifying and storing items and improve work efficiency.

### Convenient Handle

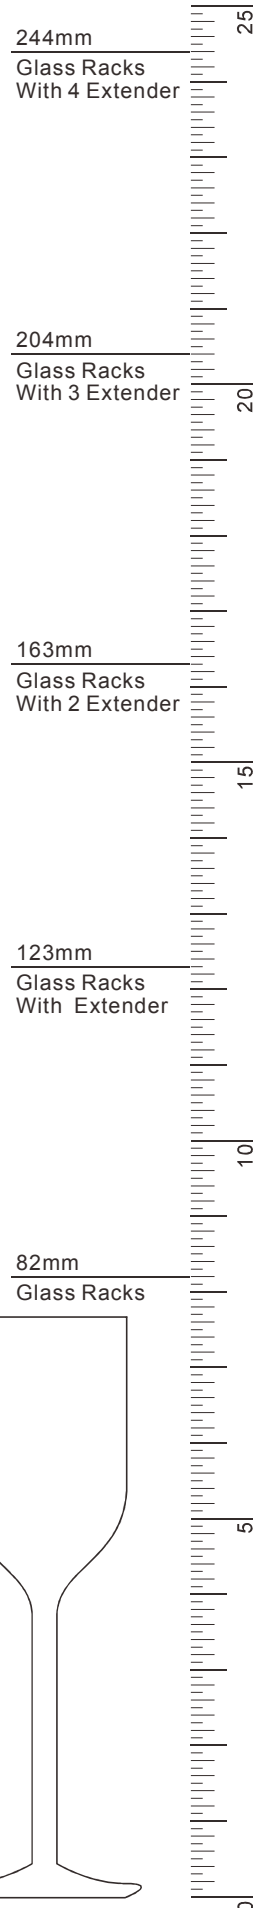

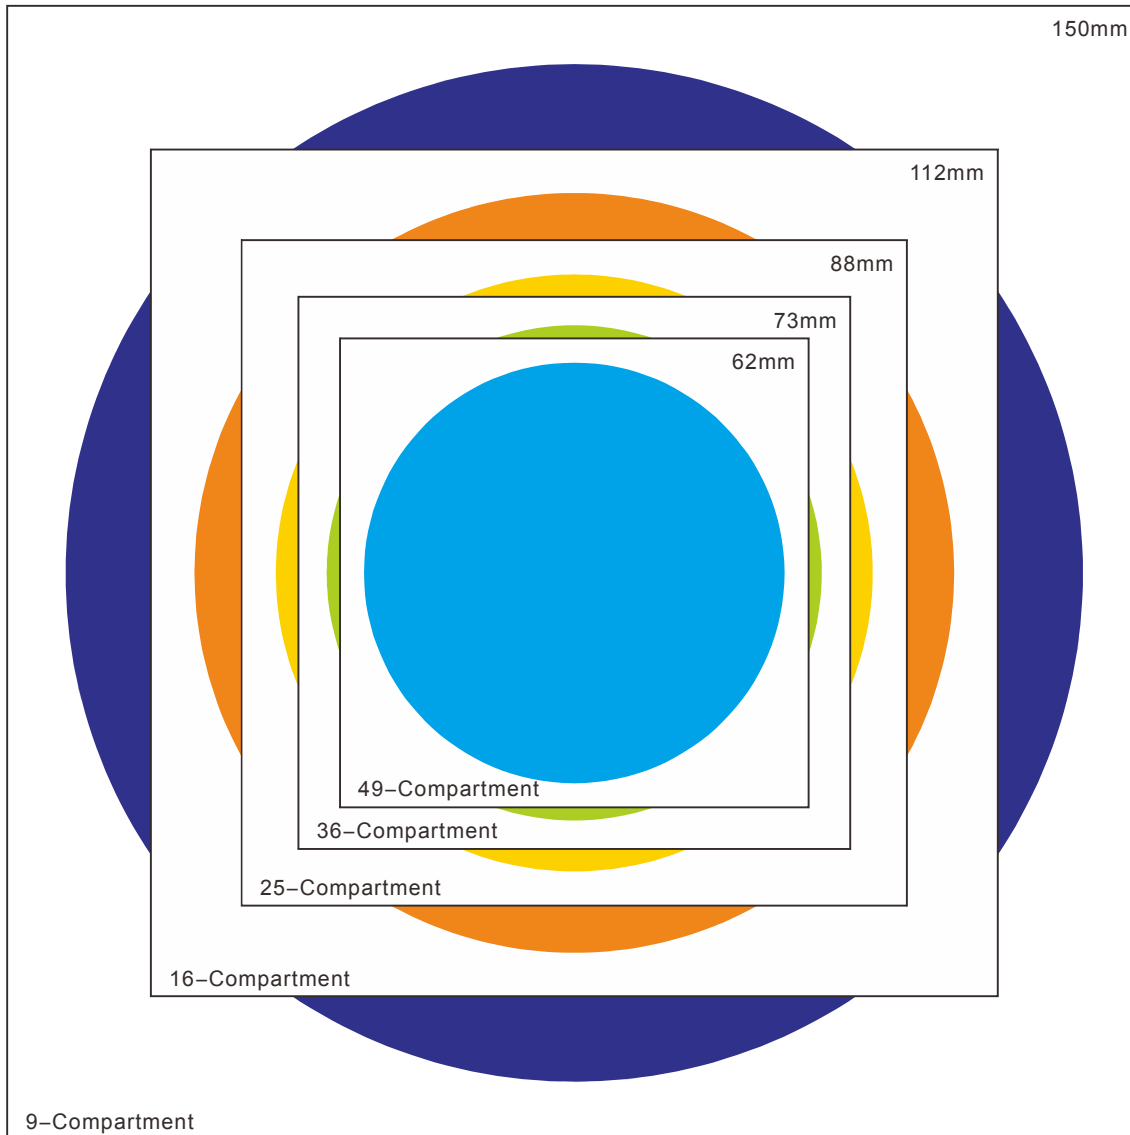

The handles on all four sides of the racks are convenient for safe delivery. Textured surface and convenient handles can avoid scratches when carried.

## Glass Rack Sizing Guide Instruction

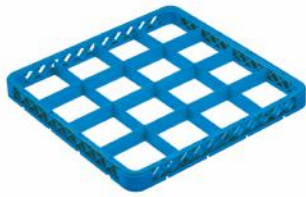

1. Place glass upside down on top of the middle circle of the sizing guide, center of the glass should be over the center of the guide.
2. Look down on the base of the glass.
3. Note the smallest square on the guide where the largest outside diameter of the glass lines up completely within the square without touching it. That is the number of compartments our rack needs to have.
4. Place lip of glass against the base line of the vertical guide on the right-hand side of the page with the base/foot of the glass pointing straight up towards the top of the page.
5. While holding the glass against the vertical guide, note where the base/foot of the glass lines up on the vertical guide. The next line above the base/foot on the guide indicates the number of extenders your rack will require.
6. Glasses with a maximum height exceeding 270mm will need more than five extenders. Each extender adds approximately 40mm of additional height to the inside compartment of the rack.

## Easy to Assemble & Adjust

Different heights of mounted hanging holes are preprocessed on the post and distributed evenly with 150mm increments, so the shelf can be adjusted without disassembling the entire unit. Corner connectors are applied to build a right-angled or U-shaped frame.

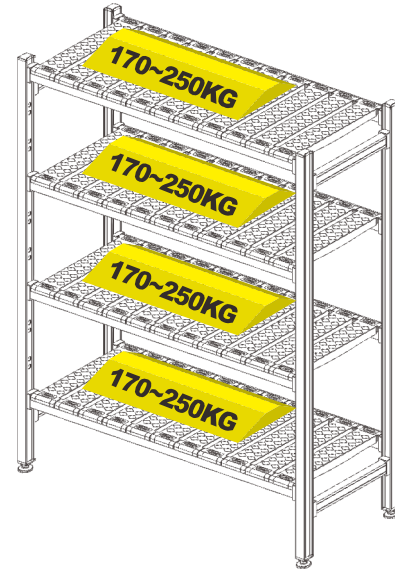

The bottle of the post is equipped with height-adjustable bolt and the unique designed self-locking nut, so a stable shelving is ensured even on the uneven floor.

## Weight Bearing Capacity

Each shelf can bear 170 to 250 KGS.

There is no loss of weight bearing capacity after an add-on unit was built up along a straight line.

Due to the weight bearing capacity of castors, the maximum weight bearing capacity of each moving shelf is 110 kg.

## Healthy and safety storage area

The shelf plates are made of high density anti-corrosion polypropylene, non-toxic and tasteless, ensuring a sanitary area for food storage.

Rust free and safe to  $-38^{\circ}\text{C}$ , making the shelving ideal for restaurant, bakeries, hospitals, storage rooms, freezers and so on. Detachable structure makes components removed or cleaned easily and quickly.

The design of product is compliance with NSF certification standards. (including castors)

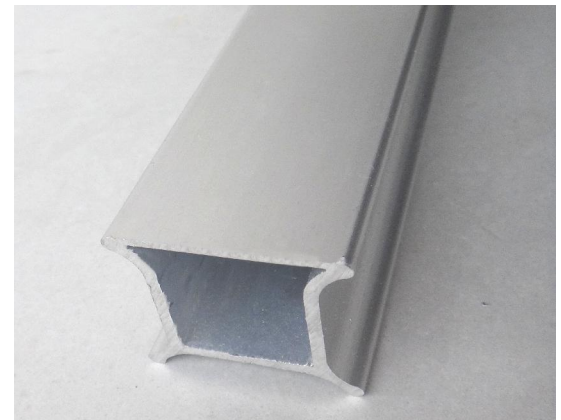

## Absolutely solid, durable and stable

The weight bearing components of posts, traverses, post connectors, with the feature of high strength, corrosion resistance, durable, are made of aluminum alloy.

All aluminum components are extruded, then the oxidation technology is applied for the shelving surface. (15um thickness of the oxide layer) Thus the purpose of anti-oxidation and anti-corrosion achieved.

Safe to  $-38^{\circ}\text{C}$  ( $-36.4^{\circ}\text{F}$ ), ideal for freezers or any wet or humid environment.

# Products Assembly

1 Assemble the top and bottom post connectors.

2 Assemble the traverses and install the shelf plates on the first tier.

3 Use the rubber hammer when installing the shelf plates.

4 Install the shelf plates of the second tier.

5 Install the shelf plates on third tier.

6 Install the top shelf plates.

## Easy to adjust and install

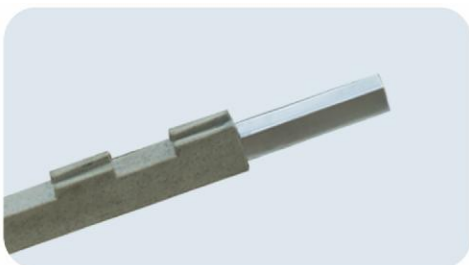

It's easy to adjust and install.  
With different sizes (3 heights, 4 widths, 6 lengths), space utilization is highly increased.  
The nets can be adjusted up or down by 100 millimeters with disassembly.  
Shelves can be built to U-shape units with corner connectors.

## Absolutely firm, durable and stable

Made from a steel core and polypropylene.  
Inner steel provides high intensity and durability.  
Exterior PP is anti-corrosion and break-resistant  
Post connectors provide exceptional stabilization.

## Never rust

Can be used anywhere, no matter moist or dry  
weldless, never rust  
Resists corrosion by brine or marine air  
Suitable for coolers and freezers, available  
under -38°C

## Basic Unit

The components of shelf can be formed into various specifications of basic units.

Vented Basic Unit

Solid Basic Unit

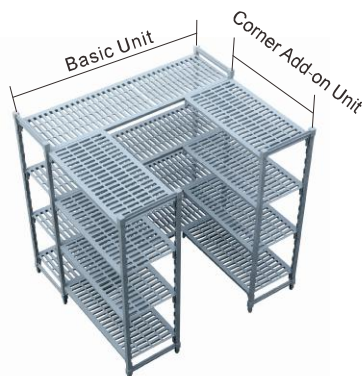

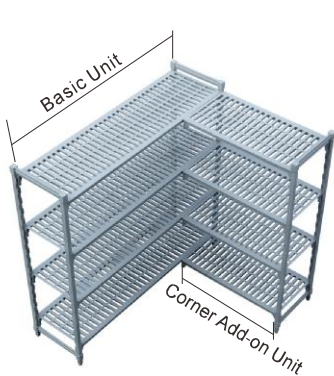

## Add-on Unit

When added to a basic unit, the traverses on the first and second unit share the middle post. As a result, only two additional posts, instead of four posts or any add-on clips, are needed.

## Corner Unit and U shape Unit

Corner connectors can build corner units and U-shape units. Traverses snap onto corner connectors just like they snap onto the dovetails of the posts.

## Mobile Unit

Inserting the specialized bolts into the casters to change the storage shelves into the move aluminum shelving system. Mobile units are unsuitable to be used as transporting cart.

## Heavy-duty Rack

To store frozen, cold and dry items 22.5cm safely off the floor. Rust free, corrosion proof and non-blending, the maximum weight load is 350kg. Different sizes of 6 heights, 4 widths of corner connectors and dunnage stand are available. Above 1220mm size must be assembled with dunnage stands and corner connectors to make sure its load capacity.

# Products Assembly

**⊘ DO NOT USE A METAL HAMMER FOR ASSEMBLY**

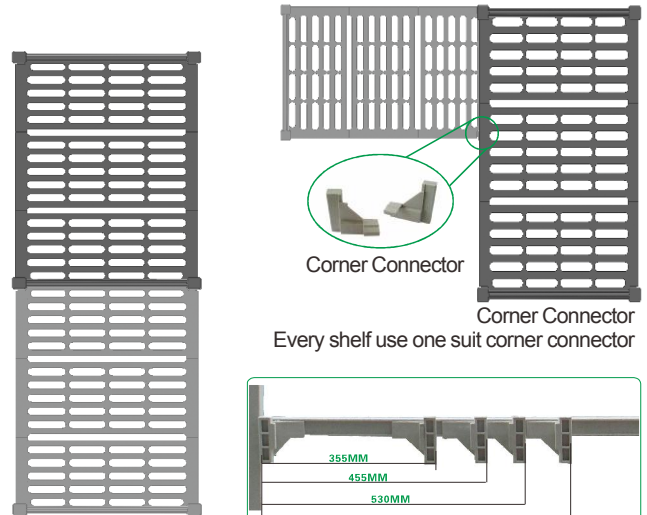

**1** Connect two posts by using a set of post connectors according to the direction of arrow. (A rubber hammer is recommended when assembling)

**2** To choose the proper height according to the sizes of traversers. Aiming at the slot of posts when installing. It can be adjusted in 100mm (4") increments.

**3** Place shelf plates on the traversers. First to put the plate on the side of traversers, then you can put the plate on the middle place of traversers according to the different sizes.

Corner Connector

Corner Connector

Every shelf use one suit corner connector

A common size in the corner

Dropped extender  
The basis of aircraft  
and dropped extender  
can be shared with the same post.

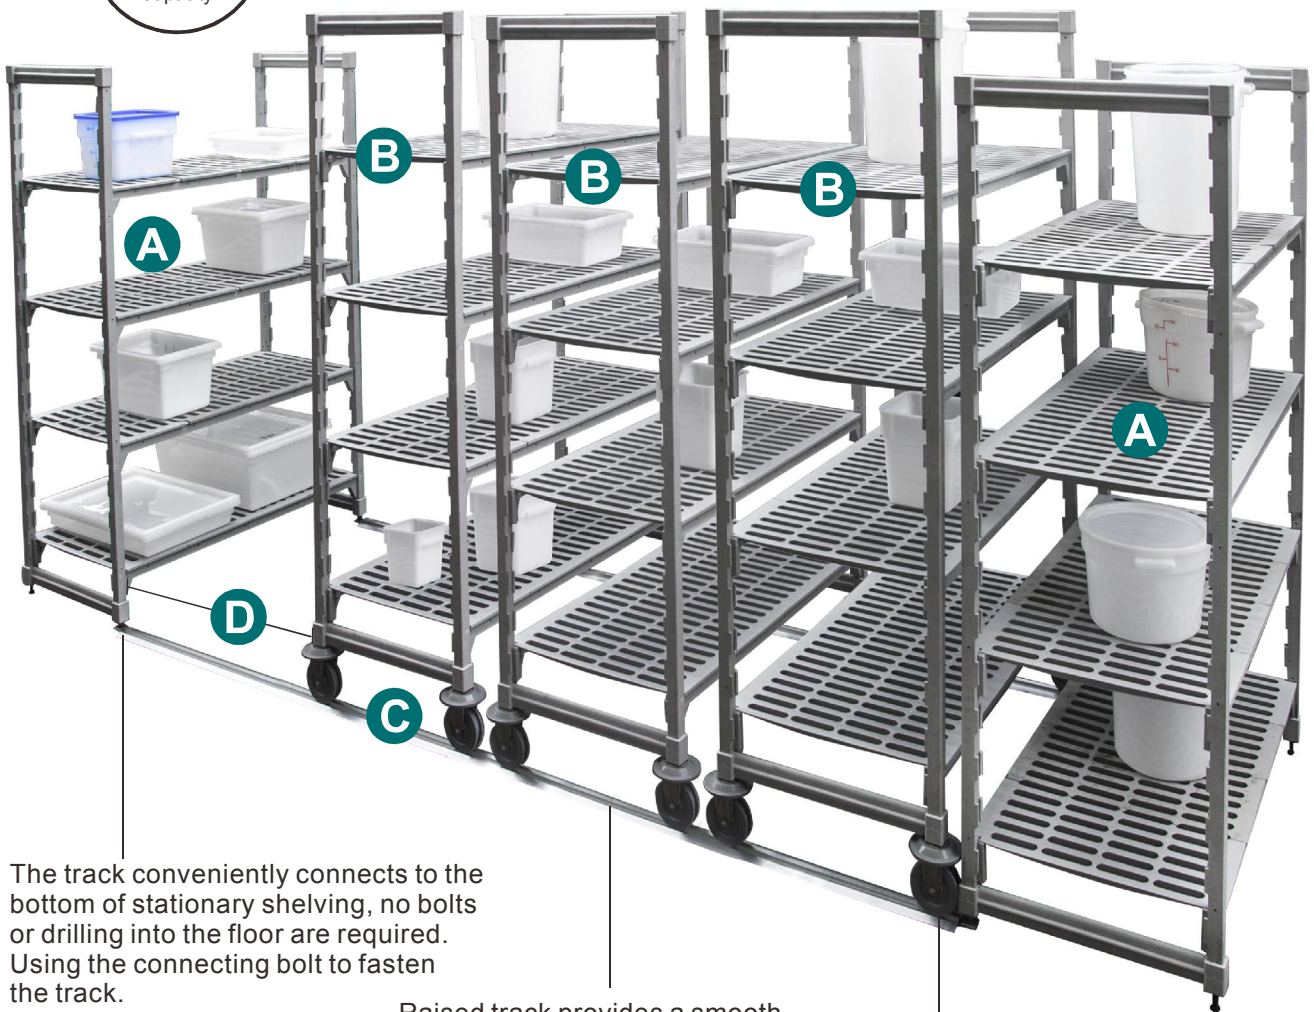

**4** Add an additional unit by connecting two more parts with post connectors and then setting traversers onto the dovetails on the posts. The traversers on the first and second unit share the middle post, place shelf plates on traversers to complete the second unit. Using corner connectors to add an additional unit.

# High Density Mobile Shelving Storage System

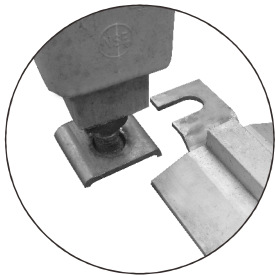

Maximum storage capacity can be achieved by forming a storage channel in all available space. The mobile shelving storage system is composed of the basic units on the raised track, with high density movable shelves in the middle. Tracks are easy to be installed without drilling or bonding.

**40%**  
Increase Storage  
Capacity

A: Stationary Units  
B: Mobile Units  
C: Track  
D: Active Aisle

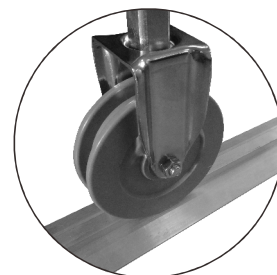

The track conveniently connects to the bottom of stationary shelving, no bolts or drilling into the floor are required. Using the connecting bolt to fasten the track.

Raised track provides a smooth surface for mobile units. It ensures dirt will not get trapped, and is easy to clean. Shelves unit with heavy weight lands can roll smoothly on the track.

Grooved casters roll easily on raised track, which can be used on any surface. The caster with a bumper can provide protection.
